GAME:

Become a futuristic globetrotter and play basketball through a series of 14 underground caverns. Race through the caverns and 'shoot' the basket to move onto the next cavern.

One or two players can take part, each using a multi-directional bat to bounce the ball along the cavern and (with practice) 'shoot' the ball into the basket. You can alter the angle of the bat to bounce the ball in different directions. Avoid bouncing onto stalagmites, stalagtites and rough rock edges otherwise your ball will burst and you will lose 10 seconds of time. If time runs out before you 'shoot' the ball into the basket, then it's game over. When playing with an opponent you can be sneaky and hit the other ball backwards or into an obstruction to gain an advantage. If one player is too slow and doesn't keep up with his opponent, then he will be re-positioned on the screen but loses 10 seconds of time.

If your score is high enough you may get the chance to enter your name on the Hi Score table. To do this, move the joystick up or down to alter the current letter and left or right to move to a different letter. When finished press the fire button to set your name on the Hi Score table.
